3D DESIGN

From the Designer...

As we began this project, the kitchen felt crowded, closed in, outdated, and simply non-serving for the new family. Together we were able to reconfigure the flow of the space, move appliances, raise the cabinets to the ceiling, and maximize functionality with clever storage solutions. The family loves their new, modern, and open kitchen!

If you feel nervous about your new kitchen, we are just a call away from a free consultation. We can guide you through this process and help make your dreams come true!

A man in a blue shirt is sitting next to her, looking at the sample. In the background, there is a computer monitor displaying a 3D rendering of a kitchen.
